The New Mexico Fire Marshal’s Division, 
The New Mexico EMT Association, 
The New Mexico Chapter International Association of 
Arson Investigators, and 
The New Mexico Fire Marshals Association 
Proudly Announce the 4th Annual 

This year’s Theme 
“Diamond Jubilee” 
The 60th Anniversary of the New Mexico Annual Fire School! 
“We’ve come a long way baby!!!”

Now available for online registration at 
https://www.regonline.com/4thannualfireemsexpo 
September 9th – 16th, 2015
Welcome to the 4th Annual New Mexico Fire & EMS Expo, a combination of the State Fire Marshal’s Annual Fire School, the New Mexico EMT Association’s Annual Conference, the New Mexico Chapter International Association of Arson Investigator’s Training Symposium and the New Mexico Fire Marshal’s Association’s Training Symposium. This year we celebrate the 60th Fire Marshal’s Annual School with a Diamond Jubilee. Come celebrate as we take a light hearted look at sixty years of state fire service training. See how it was done “back in the day”.

For seven days emergency responders will be able to select courses from the most comprehensive training ever offered in New Mexico, with more continuing education credits available than ever before. Once again training tracks include EMS, Fire Suppression, Leadership, Safety, Rescue, Code Enforcement and Arson Investigation.

Witness the bravery and accomplishments of fellow first responders and take a walk down memory lane at the opening ceremony. Honor the annual award recipients and cheer the winners of the skills competitions “Vegas Style” at the awards banquet. Check out the latest innovations in equipment and apparatus with the vendors. Salute our fallen firefighters and first responders at the New Mexico 9/11 Remembrance. Most important, come learn and return home better prepared to serve.

John Standefer New Mexico State Fire Marshal
Pete Bellows, President, NMEMTA
Mikel Ward, President, NMIAAI
Jeff Broom, President, NMSFMA
The 4th Annual New Mexico Fire & EMS Expo

“Diamond Jubilee”

Wednesday, September 09, 2015 12:00 PM –

Wednesday, September 16, 12:00 PM

Over 365 hrs. EMS CEUs
Over 100 hrs. Hands-on Classes

The agenda follows Seven Tracks,

This Quality Training is being offered at the lowest prices anywhere! This year you will want to register early and save money!

Early Registration $150 per person (Ends on August 7th)
Standard Fee $200 (From August 7th to Sept 1st)
and starting September 1st you have to pay the On Site/ Late Fee: $250
Lab Fees of $100 for Basic/First Responder Combo and EMT-I Refresher Courses!
And our new $50 hybrid refresher

Register online at https://www.regonline.com/4thannualfireemsexpo

For more information contact:
New Mexico Firefighters Training Academy
600 Aspen Road
Socorro, New Mexico 87801
Phone: (575)835-7500    Toll Free: 1-800-734-6553
Fax: (505)835-7506

Vendors: Vendors will be available Saturday and Sunday in the truck bay, vendor tent and parking lot. Please take time to visit them to learn more about new technology, “tools of the trade”, and to
shop! We have set aside time between classes and are offering a “Breakfast with the Vendors” on Saturday, so that you have plenty of time to visit with them.

Registration Information: Please fill out the registration at the Regonline website: https://www.regonline.com/4thannualfireemsexpo. Once you establish your account, you will be able to browse through the list of classes. Classes are limited in size and will be filled on a first-registered basis.

THE COMMITTEE

John Standefer, New Mexico State Fire Marshal.
Reyes Romero, Retired Deputy State Fire Marshal.
Brad T. Brunson, Interim Director New Mexico State Fire Academy.
Eldon Offutt, NMFTA Instructor/Coordinator, Captain WSMR Fire Dept. (retired).
Pete Bellows, Chief of Organ VFD, EMT-I, NMFTA, DACC, & ENMU Instructor.
Joseph DeSoto, Chief Cubero VFD, NMEMT-B, NMFTA Adjunct Instructor, President Cibola County Fire Chiefs Association.
Sally Mayeux, Hillsboro Fire and Rescue Dept., MBA/CPA, WEMT-I
Chief Mikel Ward, Alamogordo Fire Department, Certified Fire Investigator, President of the New Mexico Chapter International Association of Arson Investigators
Milo Lambert, Deputy Chief of Fire Prevention for the Town of Silver City, NMFTA Instructor, Board Member New Mexico Fire Marshals Association, EMT – I.
Tomasita DeSoto, M.A., NRP, Supervisor/Training Coordinator Mt. Taylor Amb., FF/Paramedic Cubero Vol. Fire Dept., NMFTA Adjunct Instructor, UNM EMS Academy Instructor/Coordinator, Vice-President NM EMT Association, Chair Cibola County EMS Steering Committee.
Jeff Broom, BA, Deputy Fire Marshal, Lea County Fire Marshal’s Office, President New Mexico Fire Marshal’s Association, NMFTA Adjunct Instructor

This event is brought to you in part with the generous Support of our two “Pipe and Drum” Sponsors
Tri-State proudly supports the

2015 New Mexico Fire & EMS Expo

and salutes New Mexico’s first responders and fire investigators.

Thank you for providing the protection and expertise that keeps our communities safe.

Not all reflective material is created equally.

### 3M Scotchlite™ Reflective Material

- It’s the original
- It’s durable
- It works through extreme heat
- It meets wet reflectivity standards

3M™ and Scotchlite are trademarks of 3M, used under license in Canada.
Opening Ceremonies will be held at Macey Center on beautiful New Mexico Tech Campus.

Turn West off California Street and continue west on Bullock 1.6 miles (through 3 Stop signs). Macey Center will be on your right. We will have registration set up in the lobby so you can pick up your registrant packets there.
**Track: Fire**

**All live fire & extrication courses require NFPA compliant PPE. If participating in live burns, mandatory clothing includes; a long-sleeved shirt (your conference shirt is sufficient) and long pants, made of natural fibers or Nomex. Natural fiber coveralls may be substituted for shirt and pants.**

**Fire Behavioral Burn Plus**
Class #108
Location - Fire Ground Burn Building

This is a live fire evolution. If you have never been in a burning building, this is the class for you! The "Plus" Factor is that we will take extra time discussing the PPE and SCBAs for the beginning Firefighters. We want you to get the most out of this class! This class is designed to demonstrate the stages of fire, thermal layering, and help you get a basic understanding of being in an IDLH environment. The novice firefighter will gain immense confidence in their PPE and learn how to apply the basic extinguishing techniques which are effective in a structure fire while the seasoned firefighter can witness, in a "relaxed, non-emergency" environment, the growth of a fire and the effects of various fire streams to the thermal layering and ultimately the control of the fire.

*Full NFPA compliant PPE required. SCBA will be supplied. CEU’s = 2 hrs. Prep.*

**LPG Emergencies**
Class #110, #327, & #522
Location - Fire Ground LPG Pad

This 4-hr. live fire training session is designed to provide basic hands-on instruction in the handling of Liquefied Petroleum Gas Emergencies. Topics will cover Liquid Petroleum Gas Properties, Tank and Valve designs, Transportation of LPG and Fire Ground Evolutions to include Water Applications.

*Full NFPA compliant PPE required. SCBA will be supplied. CEU’s = 2 hrs. Prep.*

**Fire Behavioral Burn**
Class #206 & #605
Location - Fire Ground Burn Building

This is a live fire evolution. How often does a Firefighter get to just witness the stages of a fire as it develops? This class is designed to demonstrate the stages of fire, thermal layering, and provide a basic understanding of being in an IDLH environment. The novice firefighter will learn how to provide the basic extinguishing techniques which are effective in a structure fire while the seasoned firefighter can witness, in a "relaxed, non-emergency" environment, the growth of a fire and the effects of various fire streams to the thermal layering and ultimately the control of the fire.

*Full NFPA compliant PPE required. SCBA will be supplied. CEU’s = 2 hrs. Prep.*

**Structural: Ventilation, Enter, Search**
Class #221 & #520
Location - Fire Ground Burn Building

This 4-hr. course is targeted for firefighters, drivers, and officers. Vent-Enter-Search, also referred to as VES, is an advanced search technique that yields great results. With VES, firefighters gain access into the structure and perform a search in an area that has a high probability of trapped victims. This is performed without the protection of a hose line and usually away from the area of fire attack. Is it hazardous? Yes, but done correctly, it may save lives. The tactic of VES has been in use for years and is now becoming normal operations for many departments. During this course, we will discuss the tactic of VES and its safe operation. Firefighters will then practice these new skills on the drill ground. Classroom setting for the first hour, and outside, hands-on training for the remainder of the course.

*Full NFPA compliant PPE required. SCBA will be supplied. CEU’s = 2 hrs. Operations.*

**Flammable Liquid Emergencies**
Class #225, #310, #419 & #509
Location - Fire Ground Flammable Liquids Pad

This 4-hr live fire session is designed to instruct the student in the handling of different types of flammable and combustible liquid emergencies. Subjects include: Definitions, Physical Properties, Transportation, Water Use, Foam Application, and Fire Ground Evolutions. PPE must comply with NFPA Standards and must pass inspection by Academy Staff. Proper clothing must be worn under the student’s protective clothing.

*Full NFPA compliant PPE required. SCBA will be supplied. CEU’s = 2 hrs. Prep.*

**Fighting the Structure Fire in a Rural Setting**
Class #307 & #506
Location - Fire Ground Burn Building

Fighting a Structure fire in an area without an established water system can be a challenge, yet most of New Mexico is in just that setting! In this session we will discuss and practice those methods which help to overcome the unique difficulties of Rural Structural Firefighting with both limited man power and resources.

*Full NFPA compliant PPE required. SCBA will be supplied. CEU’s = 2 hrs. Operations.*
**Structural Firefighting**  
Class #324 & #621  
Location - Fire Ground Burn Building

This 4-hr. session is designed to give the firefighter a basic understanding of structural fires and suppression tactics. Subjects discussed will include: Fire Flow Formula, Offensive and Defensive Attacks, Strategy and Tactics, Direct and Indirect Attacks, Incident Command System. Students will participate in various Fire Ground Evolutions.  
**Full NFPA compliant PPE required. SCBA will be supplied.**

**Structural Ventilation**  
Class #324 B  
Location - Fire Ground Smoke Building

This 4-hr “Hands On” course is designed to provide the firefighter with basic ventilation techniques and methods for various types of ventilation. You will participate in “Hands On” evolutions where both positive pressure and hydraulic methods are applied to aid firefighters in search operations and to mitigate IDLH environments within a structure.  
**Full NFPA compliant PPE required. SCBA will be supplied.**

"Thermal Imaging from the Fire Side”  
Class #334  
Location - Classroom 1A

Class will focus on the fundamentals of using a Thermal Imaging Camera (TIC). Infrared radiation will be explained along with the operating principles of a TIC. We will explore its uses in the Fire service and will touch on other uses where a TIC could be beneficial. Safety in the use of a Thermal Imager will be an important part of this presentation. Demonstrations in the use of a TIC will be conducted as a part of the class, possibly under live fire conditions. In this case turnout gear and respiratory protection will be required.  
**CEU’s = 1.5 hrs. Operations**

**Structural Firefighting**  
Class #337  
Location - Fire Ground Burn building

Is fighting a structure fire in the dark the same as during the day? This session is designed to give the firefighter a basic understanding the differences of fighting structural fires at night. Subjects include: Offensive vs Defensive Attacks, Strategy and Tactics, Direct and Indirect Attacks, Incident Command System, and Fire Ground Evolutions. Full length clothing must be worn under the student’s protective clothing.  
**Full NFPA compliant PPE required. SCBA will be supplied.**

**Night Time Flammable Liquid Emergencies**  
Class #340  
Location - Fire Ground Flammable Liquids Pad

This 4-hr live fire session is designed to instruct the student in the handling of different types of flammable and combustible liquid emergencies *with the added challenge of "Darkness"*. Subjects include: Definitions, Physical Properties, Transportation, Water Use, Foam Application, and Fire Ground Evolutions. PPE must comply with NFPA Standards and must pass inspection by Academy Staff. Proper clothing must be worn under the student’s protective clothing.  
**Full NFPA compliant PPE required. SCBA will be supplied.**  
**CEU’s = 2 hrs. Prep**

**Night LPG Emergencies**  
Class #341  
Location - Fire Ground LPG Pad

This 4-hr. live fire training session is designed to provide basic hands-on instruction in the handling of Liquefied Petroleum Gas Emergencies *with the added challenge of "Darkness"*. Topics will cover Liquid Petroleum Gas Properties, Tank and Valve designs, Transportation of LPG and Fire Ground Evolutions to include Water Applications. Be prepared for some spectacular fires and views!  
**Full NFPA compliant PPE required. SCBA will be supplied.**  
**CEU’s = 2 hrs. Prep.**

**Firefighter Drags, Carries, & Rescue Tools**  
Class # 410  
Location - Fire Ground Burn Building

This class will go over basic drags and carries for any rescue situation as well as specific tools that firefighters can use in a rescue situation to move a victim out of an IDLH environment.  
**Full NFPA compliant PPE required. SCBA will be supplied.**  
**CEU’s = 1.5 hrs. Operations**

**Fire Extinguishers for the Lay Person**  
Class #210, #411  
Location - Fire Ground Flammable Liquid Pad

You are having a relatively good day and then you notice the fire on the stove! What will you do? What can you do? Just think how much could be saved if everyone knew how to properly use fire extinguishers! In this Hands On class, the student will learn about the classification of fire extinguishers, their operations and proper techniques. Instructors will explain and display various fire extinguishers, then it is your turn. While this is a “live fire” Evolution, PPE is a minimal requirement. Helmet, Gloves and Eye protection are required to participate in the hands on section but can be provided on scene.  
**CEU’s = 1.5 hrs. Prep**
Structural Ventilation  
Class #417  
Location - Fire Ground Burn Building  
This 4-hr “Hands On” course is designed to provide the firefighter with basic ventilation techniques and methods for various types of ventilation. You will participate in "Hands On" evolutions where both positive pressure and hydraulic methods are applied to aid firefighters in search operations and to mitigate IDLH environments within a structure.  
Full NFPA compliant PPE required. SCBA will be supplied.  
CEU’s = 2 hrs. Operational

Track: Rescue

** Vehicle Extrication: "Is My Scene Safe?" Basic Stabilization  
Class #109  
Location: Fire Ground Vehicle Extrication Yard  
Is the scene safe for both my patient and myself? This is a hands-on class in the Vehicle Extrication Series. This session will focus on initial scene size-up as well as proper vehicle stabilization. Accomplished Instructors will teach students how and why we stabilize vehicles and then through a number of exercises, you will be able to apply the knowledge on the training grounds.  
CEU’s = 2 hrs. Patient Assessment & 2 hrs. Operations  
Note: This class meets pre-requisite training to enroll in any of the Expo Advanced Vehicle Extrication classes!

*** Rope Rescue - Gear and Its Uses  
Class #111  
Location – Fire Ground Drill Tower  
In this hands-on session will get a firsthand look at some of the most innovative rescue gear and how it can be used. You will also learn about the construction, ratings and care of your Life Safety Ropes along with the latest changes to NFPA Standard 1006 and how it affects both the gear and the Rescue Team!  
CEU’s = 4 hrs. Prep  
*** = The rope classes require gloves, eye protection and sturdy, above-ankle boots.

** Vehicle Extrication: "How can I Get Them Out of That?” Door Removal; Basic  
Class #209  
Location: Fire Ground Vehicle Extrication Yard  
This is another one in a series of “Hands-on” extrication classes. This session the focus is on door removal. You will learn the basic “hinge attack” and “latch attack” methods for opening vehicle doors. You will be able to participate in removal of doors from an actual vehicle.  
CEU’s = 2 hrs. Patient Assessment.  
Note: This class satisfies the pre-requisite for any of the Expo Advanced Vehicle Extrication classes.

Rope Rescue: Rescue Equipment  
Class #211  
Location – Fire Ground Drill Tower  
There is nothing wrong with buying the state of the art equipment, if, your budget can handle it. In this 4-hr "Hands On" session we will show rescuers how to provide rope rescue equipment at minimal cost. You will be amazed at how “Affordable” this stuff can be.  
CEU’s = 3 hrs. Prep  
*** = The rope classes require gloves, eye protection and sturdy, above-ankle boots.

** Vehicle Extrication: "When They Aren't On Their Wheels Anymore!” Advanced Stabilization  
Class #224  
Location - Fire Ground Vehicle Extrication Pad  
The vehicle is off the road and laying on its side or roof. Now, what do I do? This "Hands-on" session will focus on how to stabilize vehicles which are not on the roadway sitting on all four wheels. Note: This is an advanced class. You must have taken one of the “Basic” classes in order to enroll in this session. Attending todays earlier session, Class #229, is highly recommended.  
CEU’s = 4 hrs. Operations  
*** Rope Rescue: "Climbing 101"  
Class #226  
Location - Fire Ground Drill Tower  
Whether you are a novice or an experienced climber, you will enjoy this four hour session of climbing. Our Top Notch instructors will show you how to use both hardware and software to climb a static rope, change to rappel and descend again!  
*** = The rope classes require gloves, eye protection and sturdy, above-ankle boots.
**Vehicle Extrication: Alternative Access, Basic**  
Class #309  
Location - Fire Ground Vehicle Extrication Yard

Basic Vehicle Extrication – I need more room to remove the patient, now what do I do? This session will focus on roof removal to create a greater opening for patient access and removal.  
CEU's = 4 Operations

Note: This class satisfies the pre-requisite for any of the Expo Advanced Vehicle Extrication classes.

*** Rope Rescue; Rappelling 101***  
Class #311 and #514  
Location - Fire Ground Drill Tower

Have you ever wondered how it feels to rappel from a 50-foot building? Our top-ranked Rope Rescue Instructors will fit you with a harness, teach you how to use your choice of rappelling device, and allow you to enjoy the thrill of rappelling.  
*** = The rope classes require gloves, eye protection and sturdy, above-ankle boots.  
NO EXPERIENCE NECESSARY!!!  
CEUs =# 311 = 4 hrs. Operations & #514 = 2 hrs. Operational

** There's a Lot of People in There!  Vehicle Extrication: Advanced, (Sidewall Removal)  
Class #326  
Location - Fire Ground Vehicle Extrication Pad

There are multiple patients and I need lots of room to move them. This session will focus on complete sidewall removal on vehicles where the side is accessible as well as roof flapping when the vehicle is on its side. Note: This is an advanced class. You must have taken one of the "Basic" classes in order to enroll in this session.  
CEU's = 4.0 Operations

Rope Rescue: "Come Fly With Me!"  
Class #328, #342  
Location - Fire Ground Drill Tower

Zip lines seem to be all the rage in the recreational world but do they have a place in Rope Rescue? NMFTA Instructors will introduce you to the Sloping Highline concepts. We will discuss when and where they may be of use, and best of all, you will get a chance to lock into one and take "Flight" as you are lowered from the top of a 50-foot Drill Tower.  
Leather or sturdy gloves & above-ankle boots required.  
NO EXPERIENCE NECESSARY!!!  
CEU's = 4 hrs. Operations

**Vehicle Extrication: "Putting it Together in the Dark" Advanced Level**  
Class #339  
Location - Fire Ground Vehicle Extrication Pad

I have multiple vehicles and it is dark out, can I handle this now? This is a student based exercise utilizing the skills taught in previous sessions. Under limited visibility conditions the students will evaluate a multi-vehicle incident and put their skills to the test creating access to and removing multiple victims. By far, the largest percentage of our extrication calls occur during hours of darkness. In this "Hands-on" session, students work to overcome the added challenges of working in the "Darkness".  
Note: In order enroll in this session, you must have taken at least one of the Basic Level classes offered. They are Classes #109, #209, or #309,  
CEU's = 4 Operations

*** Rope Rescue Pulley Systems and Mechanical Advantage***  
Class #410.5  
Location - Fire Ground Drill Tower

This 2 hr. block is intended to introduce you to the "Mechanical Advantage" we gain through the use of pulleys on our ropes. This class should be very informative and well worth your time!  
*** The rope classes require gloves, eye protection and sturdy, above-ankle boots.  
CEU's = 2 Hrs. Operations

**Vehicle Extrication: Between a Rock and a Hard Place!, Advanced Patient Removal**  
Class #418  
Location - Fire Ground Vehicle Extrication Pad

The car is on its roof between a rock and a tree, how do I access my patients? How do you safely remove patients from the wreck? In this "Hands-on" class, the NMFTA instructor will teach students some advanced methods of patient removal. This session will focus on trunk tunneling to achieve patient access and removal.  
This is an advanced class. You must have taken one of the "Basic" classes in order to enroll in this session.  
CEU's = 4 hrs. Operations

The Ups and Downs of Rope Rescue  
Class #420  
Location - Fire Ground Drill Tower

In this session we will work with moving rescue packages, i.e. Stokes Basket with victims, up and down the tower. Students will be able to see and put into practice the Mechanical Advantage System, the Tandem Belay systems and get "First Hand" knowledge of how well the Mechanical Advantage system works for you!  
CEU's = 4 hrs. Operations  
The rope classes require gloves, eye protection and sturdy, above-ankle boots.
**Vehicle Extrication: He's Trapped**: Basic Dash Rolls
Class #508
Location - Fire Ground Vehicle Extrication Pad
This is another one in a series of 4-hr. “Hands-on” extrication classes. The steering wheel and dash are pinning the patients’ legs, how do I get them out? This final basic session will focus on dash lifts and rolls.

**Vehicle Extrication: Advanced Lifts**
Class #521
Location - Fire Ground Vehicle Extrication Pad
Advanced Vehicle Extrication – I have a patient trapped under a vehicle, now what? This final advanced extrication session will focus on lifting techniques and multi-vehicle accidents. This is an advanced class. You must have taken one of the “Basic” classes in order to enroll in this session.

***Rope Rescue: High Directionals***
Class #523
Location - Fire Ground Drill Tower
Have you ever tried to raise a heavy load up and over an edge? Whether you have the state of the art “Arizona Vortex” or simply two 4 x 4’s from the lumber yard, you will appreciate this class where you will learn how to create High Directional Devices to help you get that load past the deadly “Edge Forces”.

CEU’s = 4.0 Operations

*** “Into the Wilds” - Rope Rescue***
Class #605.5
Location - Fire Ground Drill Tower
We will meet at the Drill Tower where we will gather our equipment and then proceed to the Socorro Box Recreational Area. Once there we will spend the day applying the various skills we have been learning all week. The Expo will not provide student transportation so make plans to have a vehicle or share a ride with your fellow students. (The site is approximately 7 miles from NMF TA campus) Be sure to pack a lunch!

Note: To take advantage of this training opportunity you must have attended one or more of the rope rescue classes held earlier in the week!

*** = The rope classes require gloves, eye protection and sturdy, above-ankle boots.

CEU’s = 7 hrs. Operations

**Advanced Extrication Scenario**
Class #616
Location - Fire Ground Vehicle Extrication Yard
I have a large accident with multiple vehicles in various positions. Can we handle this? This final scenario focuses on the skills that have been used throughout the extrication classes. All the student skills from size up and stabilization will be utilized on a multi-vehicle, multi-patient scenario. Instructor participation will be extremely limited except for safety issues.

Note: This is an advanced class. You must have taken one of the “Basic” classes in order to enroll in this session.

CEU’s = 4 hrs. Operations

Sponsor

Socorro Subway owner Larry Gouldman
**Track: Responder Safety**

**Bright On! – Ken Hanzalik, Technical Services and Tim Porch, Fire Channel Manager - 3M™ Scotchlite™ Reflective Material**  
Class #201  
Location - Classroom 1B  

Retro-reflective trim on your turnout gear may seem like a minor component, but it actually can be a critical safety feature on your gear. Learn about the science of visibility, what you should look for in quality reflective trim, and how to maintain your trim for optimal performance. Session includes fun interactive components and visuals – seeing is believing when it comes to retro-reflective material.  
**CEU’s = 3 hrs. Operations**

**SCBA Basics: The Finer Points of the Self Contained Breathing Apparatus**  
Class # 207  
Location - Fire Grounds Open Air Classroom  

This class will provide the individual with a basic understanding on how the SCBA works as well as its limitations. The instructors will also provide some basic procedures in managing your air in vital emergency situations. This is a hands-on course.  
**Full NFPA compliant gear required. SCBA will be supplied by NMFTA.**  
**CEU’s = 2 hrs. Operations**

**IDLH, Air & You How do they Mix? Firefighter Air Management**  
Class # 227  
Location - Fire Ground Open Air Classroom  

This class will provide the individual with a basic understanding on how the SCBA works as well as its limitations. The instructors will also provide some basic procedures in managing your air in vital emergency situations. This is a hands-on course.  
**Full NFPA compliant gear required. SCBA will be supplied by NMFTA.**  
**CEU’s = 2 hrs. Operations**

**Class #312 Parts A, B, & C are all the Aspects of the Mayday and R.I.T. Deployment. Pick the one you feel would best suit your strong points. Be sure to sign up for the Part D session where it all comes together!**
Do You Have a Mayday?
Class #312 Part A
Location - Fire Ground Drill Tower

This class will cover principals of when to call a Mayday and firefighter survival techniques. It will include proper radio communication for Mayday (LUNAR Reports) as well as basic firefighter survival techniques to help you get out or stay alive until help arrives.

CEU’s = 2 hrs. Prep

R.I.T. For Your Department.
Class #312 Part B
Location - Fire Ground Drill Tower

Basic RIT deployment: This class will cover basic RIT principals. As a member of a RIT team, what tools you will need, basic deployment, various carries and operations for rescuing one of our own.

CEU’s = 3 hrs. Prep

Mayday Management
Class #312 Part C
Location - Fire Ground Drill Tower

I.C. the Mayday/RIT deployment: This class will give you the opportunity to learn basic strategies that will help you the Incident Commander to allocate and supervise a Mayday and RIT deployment! Be sure to also sign up for Part D where, with the help of scenarios the student will roll play supervising an incident to prepare for real life situations.

CEU’s = 3 hrs. Prep.

Mayday!
Class #312 Part D
Location - Fire Ground Drill Tower

In this session all the players from the 312 Series will interact in "Real Time" Scenarios to practice working as a team, deploying the full gamut of Mayday Training. Only those who participated in Parts A, B, or C will be eligible to enroll in this exciting final portion! We may be able to work two or three scenarios.

CEU’s = 3 hrs. Operations

Firefighter Air Management
Class #329 & #421 & #524
Location - Fire Grounds Open Air Classroom

This class will provide the individual with a basic understanding on how the SCBA works as well as its limitations. The instructors will also provide some basic procedures in managing your air in vital emergency situations. This is a hands-on course.

CEU’s = 2 hrs. Medical
Full NFPA compliant gear required. SCBA will be supplied by NMFTA.

Hazmat Drills
Class# 343
Location - Fire Ground Hazmat Pad

Test your Awareness and Operations Level Skills in this challenging session where teams will create an "Action Plan" for emergency responses to various scenarios our "Mad Scientist" has cooked up for you! Your team will be graded and critiqued on their Action Plans. Guaranteed to make you re-evaluate your department’s readiness levels.

2 hrs. Operational CE’s

"The Hazards of Working Around Energized Power Lines" -- Tri State Generation & Transmission Staff
Class #526 in Classroom 1B & Class #603 in Classroom 2B

Forest and brush fires can occur any time throughout the Tri-State system, endangering lines, substations, or telecommunication facilities of Tri-State or neighboring systems. Because of the risk to facilities and system reliability, reaction to these events is extremely important. This includes safety for fire fighters, EMS and other emergency responders. Also, included in this course will be how to make notifications to the proper utility departments to safely fight fires adjacent to utility structures and on utility structures.

Tri-State Generation and Transmission supplies electricity to many of the Electric Coops in New Mexico and throughout the Southwest. They have signed on as a major sponsor to this event and provide training to help keep our firefighters safe around their power lines. We want to thank them for their continued generous support and for providing these classes!

Landing Zone Class
Class #703
Location - Classroom 2B

The critical phase of helicopter flight is landing and departing the scene. Trained ground personnel are a vital part of helicopter operations. Selection of a flat surface, firm ground, free of obstacles, frequency and focus provide the necessary conditions for a safe landing and departure. Safety near the helicopter is paramount!

CEU’s = 1.5 hrs. Operations
**Track: Code Enforcement**

**Increasing the Credibility of the Code official**  
**Location – Best Western Convention Center**  
**Class #200**

Success as a code enforcement professional depends on credibility. Credibility and trust are necessary for effective relationships with the public. This course examines the issue of credibility as it relates to property owners, occupants, contractors, construction professionals and the media. Four areas of credibility are explored, including Personal Interaction, Professional Presentation, Technical Competence and Work Process.

**Enhancing Public Safety with Customer Service**  
**Location - Best Western Convention Center**  
**Class #300**

This seminar addresses the necessary soft skills for success as a code official—those non-technical traits and behaviors that enhance a code official’s ability to interact with others and to successfully carry out their job duties. These include people skills such as effective communication, diplomacy and customer service, but also include skills for problem solving, professionalism, integrity, and time management. In addition to a solid understanding of the technical provisions of the codes, developing appropriate soft skills are essential in pursuing the goal of safe, healthy and durable buildings for the community. The information is also beneficial for those who enforce the codes and strive to promote consistent and fair inspection practices while improving communications and public relations.  
**CEU’s = 3 hrs. Operations**

**Ethics In Public Life**  
**Location - Best Western Convention Center**  
**Class #318**

This 3-hour seminar presents the historical development of ethical theory and its practical application for building officials. The consequences of poor ethical decisions will be discussed and participants will have an opportunity to develop a personal code of ethics they can use to inform their behavior when solving ethical problems.  
**CEU’s = 3 hrs. Prep**
**Fire Plans Reviews**  
Class #502  
Location - Classroom 1B

This course will discuss the authority and importance for the fire service to conduct good quality plan review. The majority of the class will include basic plans review principals and code requirements. Subjects addressed in this class include site plan review for emergency apparatus, emergency responder access, and water supply/hydrants; review of architectural drawing for construction, means of egress, separation and compartmentalization; and determining the need for specific fire protection systems.  
*CEU’s = 2 hrs. Prep*

**“Basic Elevator Acceptance Testing”**  
Class #510  
Location - Classroom 1B

This class explains the procedures for basic elevator acceptance testing. It includes the sequence of operation of phase one and two, testing of fire alarm devices for proper operation and verifying installation of alarm and sprinkler components

**Fire Prevention Inspections in “Layman’s Terms”**  
Class #515  
Location - Classroom 1A

This basic class will present the step-by-step methodology of conducting “every day” inspections in different types of occupancies.

**Track: Arson**

**Fire ignition sources**  
Class #106  
Location – Classroom 2B

This 4 hour course will instruct the Fire Investigation Student or Firefighter on potential ignition sources identified as frequent causes of fire. This course will be both classroom and hands-on and will provide instruction on what these ignition sources are composed of, how they fail, and how they produce sufficient energy to cause a fire. This course will include demonstrations of common ignition source failures and their potential.

**Fire Marshal Partner Agreements**  
Class #709  
Location - Classroom 2B

While the authority to adopt and enforce fire codes and investigate fires and explosions for the state lie with the State Fire Marshal Division and the PRC, local governments also have the authority to conduct these activities. Learn what authority exists from Article 52 and how partnership agreements create a strong working relationship between the State Fire Marshal Division and the fire department.  
*CEU’s = 1.5 hrs. Operations*

**Crime Scene Examination (Hands on)**  
Class #208  
Location - Fire Grounds Arson Building

This 7 hour course will run the full day and will introduce and expand upon crime scene examination techniques and practices. This course will be led by Fire Investigators, Crime Scene examiners, and forensic scientists who will provide instruction on evidence identification and collection, crime scene reading techniques, forensic evidence techniques, photography, and much much more. This course will be all hands on with outdoor lecture instruction.  
*CEU’s = 7 hrs. Operations*
Fire's Out, Now What?
Class #308
Location - Fire Ground Arson Building

After the fire department has responded to a fire and put the fire out, the next question is ... now what? This 4 hour course will provide the student with training and education on what to do following a fire. How to determine if an investigation is needed. How to preserve evidence and the scene. How to preserve information for use later. This course will include both hands-on and some outdoor lecture.

CEU's = 2 hrs. Prep.

Legal Issues in Fire Investigation
Class #416
Location - Classroom 3 (Fire Station)

In this 4 hour course, we will discuss many of the issues present in Fire Investigation and scene examination. The student will be instructed on what issues are present in the different phases of fire investigation and will be provided with some tips and guidelines for working within these rules. This course will include discussion on state and federal laws, search and seizure, interviewing and interrogation, as well as an explanation of some of the major Supreme Court rulings that affect fire investigation.

CEU's = 2 hrs. Operations

Fire/Arson Scene Photography
Class #325
Location: Fire Grounds - Arson Building
This is a four hour course designed to provide the student with basic knowledge of scene photography techniques. This course will instruct the student on how fire scenes are documented, and scene photography is performed. This course is focused on the hands-on application of scene photography and will provide the student with some tips and tricks to getting the best photographs possible. This course will focus on the hands-on usage of your camera, and the taking of fire scene photographs which are courtroom quality, and easy to achieve. Students are recommended, but not required, to bring a camera with them for usage during this portion of the course.

Fire Scene Examination
Class # 507
Location: Fire Grounds - Arson Building
This 4 hour course will provide the student with hands on training in how to conduct a fire scene examination. This course will include training on fire pattern recognition, scene examination techniques, fire scene photography, and evidence collection. Students will be conducting hands on fire scene examination for the majority of this course.

CEU's = 2 hrs. Operations

Debris Evidence Collection
Class # 530
Location: Fire Grounds - Arson Building

In this 2 hour course, we will identify, document, and collect a series of items of fire debris evidence such as burn pattern, accelerant pour patterns, and ignition sources. Students will be provided with educational presentations and hands on learning opportunities, working with real fire debris evidence. This course is primarily focused on the hands on identifications, documentation, and collection of these items of evidence.

CEU's = 1 hr. Operations

Fire's Out, Now What?
Class #308
Location - Fire Ground Arson Building

After the fire department has responded to a fire and put the fire out, the next question is ... now what? This 4 hour course will provide the student with training and education on what to do following a fire. How to determine if an investigation is needed. How to preserve evidence and the scene. How to preserve information for use later. This course will include both hands-on and some outdoor lecture.

CEU's = 2 hrs. Prep.

Debris Evidence Collection
Class # 530
Location: Fire Grounds - Arson Building

In this 2 hour course, we will identify, document, and collect a series of items of fire debris evidence such as burn pattern, accelerant pour patterns, and ignition sources. Students will be provided with educational presentations and hands on learning opportunities, working with real fire debris evidence. This course is primarily focused on the hands on identifications, documentation, and collection of these items of evidence.

CEU's = 1 hr. Operations

Fire Death Investigations
Class #604
Location - Classroom 3 (Fire Station)

In this 4 hour course, the student will be instructed on how to conduct a fire death investigation. This course will cover the issues present in fire death investigations, how to conduct the fire scene examination and the requirements involved in the subsequent fire death investigation. This course will consist of mostly classroom instruction. This course is designed for the student who already has a good understanding of origin and cause examination, and fire scene examination.

CEU's = 2 hrs. Patient Assessment

Note: While not required, we recommend that you also sign up for the Scene Photography class # 325 held at 1 PM Saturday, September 12th.

CEU's = 2 hrs. Prep
Serial Killers and Crime Motivation
Class #615
Location - Classroom 3 (Fire Station)

In this 4 hour course, we will discuss some of the most notorious serial arsonists, serial killers and the fires they set. This course will include presentations of these arsonists and serial killers, and some discussion of their crimes. This course will also include presentation about some major fire investigations and fire investigation scene examinations. This course will provide the student with training in fire investigation methodology and will discuss some of the many challenges associated with major case investigation.

CEU's = 2 hrs. Prep

Fire Investigation Case Reviews
Class #705
Location - Classroom 3 (Fire Station)

In this 4 hour course, student will have the opportunity to review some of the major cases in New Mexico and our surrounding area. In this course instructors will present some of their past closed cases, and discuss the methodology and rational behind the investigation. This course is designed to be an open forum discussion and presentation.

Track: Leadership

Situational Awareness, Your First Five Minutes, and Identifying Rescue Profiles
Class #105 and #614
Location - Classroom 2A

This comprehensive course covers the term Rescue Profile and the four types used in the fire service. How Rescue Profile is used during a scene size-up and how operations are determined are covered. What types of fire conditions indicate interior fire operations, defensive operations, or a transitional attack are analyzed. Your First Five Minutes involves student participation in various emergency mitigation scenarios that firefighters are likely to encounter in today’s fire service. The scenarios are brief but allow for immediate feedback and discussion. Situational Awareness in the fire service is discussed and I will discuss the mental filing cabinet we all process and how it will be used in determining actions.

CEU’s = 4 hrs. Operations

Managing Leadership & Building a Team
Class #204
Location - Classroom 3 (Fire Station)

This informative 2.5 hour class will discuss the difference between management and leadership and how to establish a balance between the two in order to increase organizational performance. Organizational performance involves the collaboration of all individuals and displays the success of positive performance. Also to be discussed will be simple strategies for building an effective team and an introduction to establishing a Communities of Practice for leaders that will assist in investing in an organization’s members and bringing back “the love for the job”.

CEU’s = 2.5 hrs. Operations

PERA For the Career Firefighters presentation
Class #219
Location - Classroom 2B

This presentation is for career firefighters who have been making contributions and earning monthly service credit with PERA. The presentation will cover a variety of topics including: Earning service credit, The importance of having a current beneficiary, Purchasing service credit, The retirement process, Cost-of-living Adjustments

The presenter will be Patricia Thaxton, PERA Liaison Officer. Ms. Thaxton has been with PERA for 15 years and traveled across New Mexico speaking to PERA members about their retirement benefits.

CEU’s = 1.5 hrs. Prep

Grant Writing
Class #220
Location - Classroom 3 (Fire Station)

This class is designed for rural, volunteer departments and non-professional grant writers. We will focus on the most likely sources of funding for your department: the State Fire Marshal
Grant, FEMA, NM EMS Bureau grants, including Trauma System Improvement, Local System Improvement, and Vehicle Purchase Fund. We will work on composing successful grant applications, including collecting the information needed, writing the narrative and building the budget. You will leave with a plan and information to write successful grants for your department.

**CEU’s = 4 hrs. Operations**

**PERA For the Volunteer Firefighters presentation**

Class# 231  
Location – Classroom 2B

This presentation is for volunteer firefighters who want to find out more information about their retirement benefits. There will also be a demonstration on the online reporting that is now mandatory for all volunteer firefighter departments. *Be sure that your service is being reported appropriately!*  

**CEU’s = 1.5 hrs. Prep**

**So, You are the Chief?**  
Class #305  
Location - Classroom 3 (Fire Station)

In this class, State Fire Marshal John Standefer and a panel of experienced Fire Chiefs will discuss the requirements and obligations of becoming the Department’s Chief Officer. The open forum format will be greatly informative and designed to allow you get the answers to those questions that keep you awake at night. Whether you are a Volunteer or a Career Firefighter, a beginner or the seasoned veteran, you are sure to get something from this class.

**CEU’s = 3 hrs. Operations**

**Wills For Heroes!!!**  
Class # 306  
Location - Classroom 2B

*Last year this event was a huge success and this year "Wills for Heroes" is bringing twice as many Lawyers to meet the demand! Please plan to take advantage of this FREE Service!*  

The “Wills for Heroes” program provides free wills and other estate planning documents to First Responders and their spouse or domestic partner. Qualified first responders include Firefighters, Police Officers, Paramedics, Corrections and Probation Officers from Federal, State, County, City and Town Departments and Agencies. The Wills for Heroes Foundation encourages its affiliates to include retired and volunteer first responders in their programs.

**CEU’s = .5 hr. Prep.**

**If you sign up for this event, you will be assigned a time during the day to come and meet with the attorneys. This will not prevent you from attending other training and should not create a conflict on the scheduling process.**

**New Mexico Fire Protection & Grant Funds**  
Class# 323  
Location - Classroom 3 (Fire Station)

With today’s economic issues, every penny counts. Learn about the legal foundation and history of the NM Fire Protection Fund and Fire Protection Grant Fund. Staff of the New Mexico Fire Marshal Division will focus on the allowed uses of the funds and encourage you to ask the tough questions so that you can make the best use of your share of the monies.

**CEU’s = 4 hrs. Operations**

**Training Officer 101**  
Class # 404  
Location - Classroom 2B

This 4 hour session is devoted to the support and development of your Department Training Staff. We will discuss NFPA Training requirements and look at available resources such as the National Fire Academy, the New Mexico State Fire Marshal’s Office and the New Mexico State Firefighters Training Academy. We will also look at how meeting training goals and requirements can affect your ISO ratings.

**CEU’s = 4 hrs. Incident Command**

**Customer Service**  
Class # 415  
Location - Classroom 2B

Customer service is not just for businesses. We as EMS professionals serve many customers, including our patients, their families, bystanders, and other health care professionals we interact with. Mike will present concepts and case presentations on how we can better at serving our customers and representing our organizations.

**CEU’s = 4 hrs. Prep**

**Harassment, Hazing & Bullying in the Fire Service**  
Class # 501  
Location - Classroom 1A

What are your responsibilities in preventing harassment and what penalties both legal and criminal can occur for those that participate in harassment and those that did not report the harassment? The course covers legal relevance of harassment and bullying in today’s fire service. Expectations from city and county governments will be discussed along with history of relevant incidents in the RRFD and other departments. We will look at lessons learned from the past and how the media / public perception shapes behavior and punishment in the fire service. Fire department culture is discussed from a leadership perspective.

**CEU’s = 1.5 hrs. Operations**
Writing Employee Evaluations
Class # 516
Location - Classroom 1B
What are the guidelines in your department for evaluations and when do they occur? This course discusses the overall employee evaluation process both in terms of informal and formal evaluations. The importance of the evaluation process is discussed and the purpose of conducting employee evaluations is debated. The 360 evaluation process will be discussed and its importance in today's fire service.

CEU's = 1.5 hrs. Operations

Data Analysis in Today's Fire Service
Class #610
Location - Classroom 2B
This course covers the importance of comprehensive data analysis in the fire service. Different types of analysis are covered including looking at the importance of gathering data in examining trends, justifying needs, obtaining funds, and allocating resources. The significance of collecting critical data in everyday fire reporting is discussed and relevant examples are used. Other topics covered include: Risk analysis, displaying your data, describing your fire problem, and using data for fire prevention.

CEU's = 1.5 Operations

The Actual Role of the Incident Commander On Scene!
Class #620
Location - Classroom 2A
It's not... the person treating the patient, putting out the fire or arresting the bad guy! A look at ICS and the REAL role of the I/C and the other KEY general staff positions, followed by team competition exercises to develop an ICS team on the fly.

CEU's = 1.5 Operations

ISO Round Table
Class #704
Location - Classroom 2B
In this 2-hour segment, the student will receive training on how the ISO Rating is established. We will discuss how recent changes may affect your department and what you must do to bring your departments ISO Rating to its highest possible level. This is a great class for the new Fire Chief as well as for the Seasoned Veteran.

Fire Marshal Partner Agreements
Class # 709
Location - Classroom 2B
While the authority to adopt and enforce fire codes and investigate fires and explosions for the state lie with the State Fire Marshal Division and the PRC, local governments also have the authority to conduct these activities. Learn what authority exists from Article 52 and how partnership agreements create a strong working relationship between the State Fire Marshal Division and the fire departments.

CEU's = 1.5 hrs. Operations

Track: EMS

First Responder/EMT-B Combo Refresher
Class #101
Location: This class will be held in the Best Western Convention Center behind McDonalds off California Street. Break snacks will be provided.

This is a State of New Mexico approved course. It meets the refresher requirements for First Responder and EMT-Basic renewal. Additionally, this course meets NREMT refresher requirements for First Responder and EMT-Basic certification renewal. Students must be licensed EMS providers. This refresher
will include airway management review, medication administration review, mental health first aid, dissection of live tissue and skills review. Hands on approach with group work. 

**Meets the refresher requirements for EMS licensure renewal at the First Responder and EMT-Basic** 

*Note: This is a 3 day course. To receive credit, you must attend all 3 days.*  
CEU’s = 24 hrs. 

**EMT Intermediate Refresher**  
Class #102  
Location: This class will be held in the Best Western Conference Center behind McDonalds on North California Street. Break snacks will be provided.  

This is a State of New Mexico approved course. It meets the refresher requirements for EMT-Intermediate licensure renewal. Students must be licensed EMS providers. This refresher is designed for the specific topic and skills needs of the EMT-Intermediate. Refresher topics include airway management review, ETCO2 review, medication administration review, mental health first aid, dissection of live tissue and skills review. Hands on approach with group work.  

*There are additional requirements to meet the NREMT Refresher requirements.*  
**Note: This is a 3 day course, to receive full credit, you must attend all three days.*  
CEU’s = 24 hrs. 

**Shock: Our Patient's Worst Enemy**  
Class #103  
Location - Classroom 1A  

Sean will discuss shock in its various stages and types. He will address the clinical presentation of signs and symptoms and the treatment of shock.  
CEU’s = 1.5 hrs. Medical 

**Is it really abuse? Subtle and not-so-subtle findings in child abuse.**  
Class #104  
Location - Classroom 1B  

Pediatrics and disasters: difficulties faced by children and families during a disaster and how to plan for them. (Both topics will be covered by Dr. Jolley during this session.)  
CEU’s = 1.5 hrs. Pediatrics  

**CPAP: pre-hospital use of Continuous Positive Airway Pressure Therapy for all EMS levels**  
Class #107  
Location - Classroom 3  

This course will address the use of Continuous Positive Airway Pressure therapy on patients experiencing respiratory distress/failure. Students will review the basic anatomy and physiology of the respiratory system in addition to reviewing common respiratory emergencies in the adult patient. Different CPAP devices and their application will be presented throughout this course.  
CEU’s = 1.5 hrs. Airway and ventilation 

**What the research says**  
Class #113  
Location - Classroom 1A  

Come find out how we can do a better job in the classroom to assist our students to grasp and retain the information easier. This class will review the current and classic research to help you be more effective and efficient in the classroom.  
CEU’s = 1.5 hrs. Incident Command 

**New Car Technology for the Rescuer**  
Class# 114  
Location - Classroom 1B  

This is a classroom presentation that will provide an update to the anatomy and construction of today’s vehicles. Topics covered include: vehicle design, vehicle electrical systems, supplemental restraint systems, hybrid vehicles and an introduction to scene safety.  
CEUs = 1.5 hrs. Operations 

**Pediatric Checkers**  
Class #115  
Location - Classroom 3 (Fire Station)  

This presentation takes the form of an interactive similar to the popular board game Checkers. A large “game board” will be created on a large flat area. Students will be divided into two teams. Each team will take turns at a trivial pediatric question in order to progress a game piece if answered correctly. The team that completes the game with the highest score at the end of the 1.5 hours wins the activity.  
CEU’s = 1.5 hrs. Pediatrics 

**Neonatal Management**  
Class #202  
Location - Classroom 1B  

This class will provide an overview of management principles and techniques for the newborn patient. ALS and BLS management will be discussed as well as a review of the updated 2011 Neonatal Resuscitation Guidelines.  
CEU’s = 1 hr. Pediatrics
Assessing With Purpose! Part 1
Class #203
Location - Classroom 1B
So often we assess our patients based on habit rather than purpose. Ann will address the skill and insight of using “Purpose” to guide your assessment. We will start out with an assessment activity that will require you to “bag” your assessment and move on to applied case studies and hands on components that will get you focused on assessing with purpose. Note: Class #214 is a continuation of this class but you are not required to take both parts.
CEU’s = 1.0 hr. Patient Assessment.

Managing Leadership & Building a Team
Class #204
Location - Classroom 3 (Fire Station)
This informative 2.5 hour class will discuss the difference between management and leadership and how to establish a balance between the two in order to increase organizational performance. Organizational performance involves the collaboration of all individuals and displays the success of positive performance. Also to be discussed will be simple strategies for building an effective team and an introduction to establishing a Communities of Practice for leaders that will assist in investing in an organization’s members and bringing back “the love for the job”.
CEU’s = 2.5 hrs. Operations

The Basics of ECGs for Basics
Class #205
Location - Classroom 3 (Fire Station)
Mike will introduce you to the basics of ECGs, become familiar with common non-life threatening and life threatening rhythms and how to identify them. The course will review how to obtain ECG readings, the basic electrophysiology and the rhythms.
CEU’s = 2.5 hrs. Medical

Pediatric Pain Management & Sedation
Class #213
Location - Classroom 1B
Pain management in the pediatric population can be difficult and challenging for hospital and pre-hospital providers alike. Kids frequently receive little or no pain management in the field. This class will discuss pain assessment, pharmacological and non-pharmacological techniques and new delivery methods that can aid us in our care of pediatric patients.
CEU’s = 1 hr. Pediatric

Assessing With Purpose!
Class #214
Location - Classroom 1B
So often we assess our patients based on habit rather than purpose. Ann will address the skill and insight of using “Purpose” to guide your assessment. We will start out with an assessment activity that will require you to “bag” your assessment and move on to applied case studies and hands on components that will get you focused on assessing with purpose. Note: Class #214 is a continuation of class # 203 but you are not required to take both parts.
CEU’s = 1 hrs. Patient Assessment

EMS Mentoring: Preparing the Next Responders
Class #216
Location - Classroom 1A
Remember when you were the new kid on the squad? Who helped you learn the ropes? It is now your turn to share your knowledge to the new members. Come learn how to develop and participate in a mentoring program in your department.
CEU’s = 1.5 hrs. Operations

Special Needs Pediatrics
Class #217
Location - Classroom 1B
This class will assist the responding in recognizing the needs of children with special needs and their medical needs and the special equipment they may encounter at the patient’s home, and that the best source of information is the patient’s caregiver.
CEU’s = 1.5 hrs. Pediatric
Medical challenge
Class #218
Location - Classroom 2A

This class will bring you a challenging set of cases from pediatric to geriatric. The assessment, physiology and the process of differential diagnosis will be presented along with a review of the medication dosages, actions, and side effects that should be considered.

CEU’s = 1.5 hrs. Medical

Grant Writing
Class #220
Location - Classroom 3

This class is designed for rural, volunteer departments and non-professional grant writers. We will focus on the most likely sources of funding for your department: the State Fire Marshal Grant, FEMA, NM EMS Bureau grants, including Trauma System Improvement, Local System Improvement, and Vehicle Purchase Fund. We will work on composing successful grant applications, including collecting the information needed, writing the narrative and building the budget. You will leave with a plan and information to write successful grants for your department.

CEU’s = 4 hrs. Operations

To Restrain or Not To Restrain: Keeping Everyone Safe!
Class #228
Location - Classroom 1A

This course will cover the basics of patient restraint, how to perform it safely, and review cases studies of previous incidents to help students make the decision if restraining a patient is the safest means of treatment and transport. Simple self-defense techniques will also be presented in the event of patient attack on a responder.

CEU’s = 1.5 hrs. Operations

Quoth the Raven
Class #229
Location - Classroom 1B

Face it! None of our many years and levels of training adequately covered care for the dead and dying. It remains too important to overlook. Let us spend some time catching up with forgotten or previously unlearned facts and principles.

CEU’s = 1.5 hrs. Medical

Trauma update
Class #230
Location - Classroom 2A

This class will review the changes PHTLS introduced this year in trauma care. Come to the class and find the latest changes in the “Gold Standard” of trauma care.

CEU’s = 1.5 hrs. Trauma

Patients who give it all – organ donors
Class #301
Location - Classroom 1A

This course will address the difficult intersection of technological interventions to preserve life before death or preserve organs for transplantation after death requiring collaboration between the deceased donation and resuscitation communities to address evolving challenges. Students will be encouraged to participate in a discussion involving their service protocols in potential organ donors that are unlikely to survive sudden cardiac arrest.

CEU’s = 1.5 hrs. Medical

Where did I learn that!!!!!
Class #302
Location - Classroom 1B

Let’s do a down and dirty review of the newborn infant and what their initial needs are. We will do a review of the healthy infant and the infant that is not compensating or perfusing. Once the basics are covered, the group will have an opportunity to practice and handling and treating of newborn infants with a hands-on lab.

CEU’s = 1.5 hrs. Pediatric

Drugs for NM EMT’s
Class #303
Location - Classroom 2A

This class will be a review of the drugs in the NM Scope of Practice for EMT Basics and Intermediates. Once the review is complete, there will be an opportunity for students to draw up medications, break a vial, and use the MAD device.

CEU’s = 1.5 hrs. Medical

When They Don’t Take Your Ride: Patient Refusals
Class #304
Location - Classroom 2B

One of our common calls. Come learn who should get to refuse treatment and how to document their refusal.

CEU’s = 1.5 hrs. Operations
Pediatric Respiratory problems
Class #314
Location - Classroom 1A

We will learn to differentiate between and treat respiratory distress and respiratory failure, croup and epiglottitis, and other common respiratory issues with pediatric patients.
CEU's = 1.5 hrs. Pediatric

Yes, It Can Happen to You! Are You Ready?
Class #315
Location - Classroom 1B

Fire - Rain - Floods - How do EMS Providers prepare? Bert will discuss the challenges rural and frontier services face as they prepare for the challenges of and the aftermath of nature’s trauma.
CEU's = 1.5 hrs Operational

Uncommon Neuro-Emergencies
Class #316
Location - Classroom 2A

Myasthenic Crisis, Parkinsonian Crisis, And Autonomic Dysreflexia? Uncommon emergencies, but neuro emergencies are more than just strokes and seizures. Find out what’s going on inside that brain in this overview of brain busters!
CEU’s = 1.5 hrs. Medical

Patient Assessment
Class #317
Location - Classroom 2B

The most important skill you can have is patient assessment. Come listen to Cynthia remind you that it is the way you build your treatment pathway!
CEU’s = 1.5 hrs. Patient Assessment

A Trip around the World!
Class #319
Location - Classroom 1A

There are many different substances abused such as cocaine, methamphetamines, ecstasy, and spice in the U.S. We also need to be aware of not-so-familiar substances that are popular outside of the U.S., such as Krokodil and Scopolamine for that time when they appear in the U.S. We can encounter these at any time, and we need to be prepared for the substances we are not so familiar with.
CEU’s = 1.5 hrs. Medical

Pediatric trauma
Class #320
Location - Classroom 1B

Be prepared to anticipate, assess and review the priorities of each as Bert discusses care of the pediatric patient.
CEU’s = 1.5 hrs. Pediatric

Airway is our friend
Class # 321
Location - Classroom 2A

This will be a complete review of various airway devices used by NM EMT’s. Once we complete the review, we will provide a lab where students will have the opportunity to do hands-on practice and placing the various airways. During the lab set up, Jay will set up a suction lab for students to review patient suctioning.
CEU’s = 1.5 hrs. Airway and Ventilation

60 Second Moulage
Class #322
Location - Classroom 2B

A brief introduction to basic moulage techniques with supplies from your local grocery, dollar stores, and online discount shops. Moulage will include bruising techniques, lacerations, abrasions, simple amputations, avulsions, burns, open chest wounds, fake vomit, fake blood, etc.
CEU’s = 4 hrs. Operations

Puff the magic dragon (CPAP)
Class #330
Location - Classroom 1A

“Yes, Virginia; you can save lives with CPAP”. (an oft forgotten option). A comprehensive update on cardiac and respiratory crises including CPAP and CPR, with concentration on survival. The values of teamwork and communication that never change.
CEU’s = 1.5 hrs. Airway and ventilation

Multi-system Trauma
Class #331
Location - Classroom 1B

Multisystem Trauma requires a multisystem approach. Where to start and how to prioritize these patient’s needs is a challenge. This class will meet that challenge!
CEU’s = 1.5 hrs. Trauma
Move F.A.S.T. for Stroke  
Class #332  
Location - Classroom 2A

During an acute ischemic stroke, a patient loses 20,000 brain cells in a minute’s time. This presentation will cover the basic pathophysiology of stroke, stroke mimics and misses, the importance of tPA, and new intra-arterial therapies for stroke.  
CEU’s = 1.5 hrs. Medical

Ambulance Rounds  
Class #335  
Location - Classroom 1B

Responders will be pushed to use critical thinking skills in clinical management and therapeutic communication with patients. The responders will interactive in active patient scenarios with live, moulaged patients presenting with various trauma and medical related issues.  
CEUs = 2 hrs. Medical & 2 hrs. Trauma

Volunteer Victims  
Class #335A  
Location - Classroom 1B

In order to make the “Ambulance Rounds” scenarios real, we will need some “Victims”. Come on down and let our “Mulage” Experts make you sick! What a fun way to earn CEU’s. Please arrive on time so we can make you “Sick”!  
CEU’s = 2 hrs. Trauma or 2 hrs. Medical depending on your role!

BLS Healthcare Provider CPR Refresher  
Class #336  
Location - Classroom 2A

$20 Lab Fee. Do you need to refresh your BLS Health Care Provider CPR?  
The Lab Fee for this CPR Refresher course covers your Certification Card with American Heart.

Hybrid EMT Combo Refresher  
Class #400  
Location - Best Western Convention Center

The new format of the combo refresher will require you to complete sixteen (16) hours of distributive education online and eight (8) hours of face-to-face classroom lab time that will include a comprehensive review of Pre-hospital medicine for the Pre-hospital care provider from the first responder level through the EMT Intermediate. New material relevant to recertification of the New Mexico First Responder, EMT Basic and EMT Intermediate licensure will also be included in this hybrid course. This course will have mandatory online homework. Failure to complete the online homework assignments will result in the student failing the course and will not receive a course completion certificate. To enroll you must complete your registration here and go to https://registration.xenegrade.com/unmense. You will need to create an account or sign in if you already have one.

Traffic Management 101  
Class #401  
Location - Classroom 1A

One of the most dangerous environments for our first responders is our roadways. Come learn how to create a safe place to perform our skills. This class is The National Traffic Management Responders Training Program.  
CEU's = 4.0 hrs. Operations

Hazmat Injuries  
Class #402  
Location - Classroom 1B

We will learn how to recognize and treat injuries caused by hazardous materials such as nerve agents, cyanide poisoning, carbon monoxide and other chemicals.  
CEU’s = 1.5 hrs. Airway

The Older They Get: The Geriatric Patient  
Class #403  
Location - Classroom 2A

Our Patients are getting older. Come learn about ways to communicate, collect a history and sort through their many medical problems.  
CEU’s = 1.5 hrs. Patient Assessment

The Monster Inside of Us  
Class #408  
Location - Classroom 1B

We see things every day that change who we are. Some of these affect us more than others. Many responders are taking their own lives because of the hardships caused by the job. There are also many men and women diagnosed with PTSD each year and we may get called to them. The idea behind this course is to recognize the signs and symptoms within ourselves and those who we get called to and to learn how we can help.  
CEU’s= 1.5 hrs. Medical
Viral Diseases of Childhood  
Class #409  
Location - Classroom 2A  

Childhood vaccination programs have greatly improved the health of our pediatric population. Even so, there have been a number of large outbreaks of some of these diseases that we thought we had all but eradicated. When was the last time you saw a patient with measles, mumps, or chicken pox? We’ll look at these and more to refresh our memory, differentiate one from another, protect ourselves, and assure optimum care for our small patients!  
CEU’s = 1.5 hrs. Pediatric

Fire Ground EMS  
Class #412  
Location - Classroom 1A  

This presentation will take the form of a traumatic or medical emergency that may occur to responders while responding to various fire, rescue, and extrication situations. Responders will use critical thinking skills in mitigating the potential hazard in addition to treating a downed firefighter. Groups will be evaluated on scene management and rapid identification and treatment of an injured responder.  
Note: Students are required to have taken the basic fire course related to each burn pad prior to participating in the activity.  
CEU’s = 1 hr. Medical, 1 hr. Pt. Assessment, 1 hr. Airway and 1 hr. Trauma

Burns 1 - 2 - 3  
Class #413  
Location - Classroom 1B  

An in-depth look at the current trends in burns and treatments, burn kinematics and physiology, based on the latest evidence-based medicine from the American burn Association/American College of Surgeons.  
CEU’s = 1.5 hrs. Trauma

Pulmonary Hypertension  
Class #414  
Location - Classroom 2A  

Whether it is a complication of birth or a problem that develops in adulthood, pulmonary hypertension (PH) can be fatal... particularly if unrecognized. PH has a number of causes and risk factors that we need to be aware of in order to recognize it. The frightening part is that PH can look like a number of other medical problems and is easily mistaken for them. Additionally, some of the medications prescribed to treat it react very poorly with a med we commonly administer in EMS. In this session, we’ll take a closer look at pulmonary hypertension, how we can more easily recognize it, what we can do to treat it in the field, and how our knowledge can help our patient live longer with (hopefully) fewer complications.  
CEU’s = 1.5 hrs. Medical

Customer Service  
Class #415  
Location - Classroom 2B  

Customer service is not just for businesses. We as EMS professionals serve many customers, including our patients, their families, bystanders, and other health care professionals we interact with. Mike will present concepts and case presentations on how we can better at serving our customers and representing our organizations.  
CEU’s = 4 hrs. Preparatory

Where Have All the Backboards Gone?  
Class #422  
Location - Classroom 1A  

Bob will take a look at the research that has changed the way we treat our patients as backboards become more an outdated tool.  
CEU’s = 1.5 hrs. Patient Assessment

EMS Hazmat Table Top  
Class #423  
Location - Classroom 2A  

What will you do in the first 30 minutes of a Hazmat Scene? Please join us for some table top exercises looking at different types of hazmat scenes. We will set up perimeter/evacuations/resources/personal/equipment. What would you want to call out? We will take ERGs and use them to set up the scene.  
CEUs = Your Choice of 1.5 hrs. Operations or 1.5 hrs. Incident Command

Diabetes in Pediatric Patients  
Class #424  
Location - Classroom 2A  

The rate of diabetes in our population is alarming and shows little hope of declining. In this session we’ll take a look at this disease in pediatrics, its potential causes, risk factors, types, field management, transport considerations, and how WE can impact the daily lives of pediatric diabetics. A little knowledge Face it! None of our many years and levels of training adequately covered care for the dead and dying. It remains too important to overlook. Let us spend some time catching up with forgotten or previously unlearned facts and principles.  
CEU’s = 1.5 hrs. Medical

Stillwater Rescue  
Class #500  
Location - Comfort Inn of Socorro Swimming Pool  

You have read it in your book. You’ve heard the lecture. Now come put those skills to work. Pete will review drowning, near drowning, and STILL WATER rescue. Then you will put your rescue skills to work as we practice these skills in the pool. Swimming suit required.

CEU’s = 2 hrs. Patient Assessment, 1 hr. Airway and 1 hr. Operations
Albuterol Overdose- Does This Really Happen?
Class #503
Location - Classroom 2A

This course will review the basic anatomy and physiology of the respiratory system, the pharmacokinetics of Albuterol, and the potential for patient overdose including the pathology, signs/symptoms, and treatment. A case study will be presented for the students to use critical thinking in how to address the issue of an Albuterol overdose.

CEU's = 4.0 hrs. Medical

What's Worse than a Bee Sting...? 50 bee stings!
Class #504
Location - Classroom 2A

In 2012, I found myself and a patient I was treating covered in bees on the side of a cliff face at 3:00 a.m. in the Sandia Mountains. Come hear the rest of the story and also a discussion of allergic and anaphylactic emergencies. Can a patient be in anaphylaxis without having airway swelling? Will epinephrine be effective on a patient taking a beta-blocker? H1 vs. H2 blockers? These questions and more will be answered.

CEU's = 1.5 hrs. Medical

EPIC - TBI: Excellence in Pre-Hospital Injury Care - Traumatic Brain Injury
Class #505
Location - Classroom 3 Fire Station

EPIC-TBI was developed by the University of Arizona and Arizona Department of Health Services to drastically increase the number of severe TBI (traumatic brain injury) victims who survive with good neurological outcome by thoroughly implementing the national EMS TBI guidelines.

CEU's = 1.5 hrs. Trauma

"No, not Fevers!". Come hear about some cutting edge pediatric care. Dr. Moore will talk about pediatric poisonings, airway management, medication routes, pain management, and other timely topics.

CEU's = 1.5 hrs. Pediatric

Hypothermia Treatment - Fact or Fiction
Class #512
Location - Classroom 2B

"Hypothermia" and its management are bedeviled by misunderstandings and dogmas which have unfortunately become embedded in the literature.” – Evan Lloyd on Accidental Hypothermia. Our treatment of hypothermia has changed little in EMS over the past 20 years. In this session we will discuss the current international consensus on the treatment of accidental hypothermia. We will review the pathophysiology and stock your tool belt with new treatment techniques.

CEU's = 1.5 hrs. Medical

Sweet Justice
Class #513
Location - Classroom 3 Fire Station

Diabetes mellitus is rampant in today’s population. Current EMS providers will inevitably cross paths with this disease numerous times throughout their careers, but will their assessment and treatment align with accepted practices? Eric delves into this metabolic disorder, discussing the pathophysiology and common sequelae affiliated with DM.

CEU's = 1.5 hrs. Medical

Is it Abuse or Custom?
Class #517
Location - Classroom 2A

This lecture will look at the changing attitudes and norms for what constitutes abuse. We will look at the historical perspectives, the different cultural views on abuse, and how in the last few decades what was previously accepted punishment is now considered abuse or neglect.

CEU's = 1.5 hrs. Pediatric

Code 1 Catastrophes - Medical
Class #518
Location - Classroom 1A

A case series of EMS calls for patients with seemingly routine complaints who ended up having life-threatening pathology.

CEU's = 1.5 hrs. Medical
The Frail Chest  
Class #519  
Location - Classroom 3 Fire Station

Nowhere else are there more critical structures that play more critical roles with such critical consequences than in the chest. This course will provide review and discussion of considerations that should be taken by all levels of EMS when assessing and treating patients with potential chest trauma.  
*CEU's = 1.5 hrs. Trauma*

STDs for EMTs: Causes, Recognition and Treatment  
Class #527  
Location - Classroom 2A

STDs are prevalent in our society but rarely talked about or covered in EMS classes. This presentation will enlighten the EMS provider as to the causes, signs and symptoms, and treatments of many STDs that often mimic other conditions. Disclaimer: this presentation will contain graphic images of genitalia and material that may not be suitable for all audiences.  
*CEU's = 1.5 hrs. Medical*

Code 1 Catastrophes - Trauma  
Class #528  
Location - Classroom 1A

A case series of EMS calls for patients with seemingly routine complaints who ended up having life-threatening pathology.  
*CEU's = 1.5 hrs. Trauma*

Bleeding control – from pressure to TXA  
Class #529  
Location - Classroom 3 Fire Station

Blood loss is a serious concern. We need to recognize and control it. The more effective we are, the greater the chance of the patient’s survival. This class will review the current practices of bleeding control and will present the priorities of care from pressure to tourniquets to TXA.  
*CEU's = 1.5 hrs. Trauma*

Cardiac assessment  
Class #600  
Location - Classroom 1A

What to look for in the initial assessment of the cardiac patient. Believe what you see!  
*CEU's = 1.5 hrs. Assessment*

EMS Pictionary  
Class #601  
Location - Classroom 1B

This interactive class will allow students to use medical terminology in the form of pictures to motivate students in a competition to visually identify various illnesses, injuries, and human anatomy. EMS Pictionary will allow students to build team working skills in addition to practicing non-verbal communication that will aid in EMS field work for special population patients such as the hearing impaired or patients who have a language barrier (non-English speaking).  
*CEU's = 1.5 hrs. Medical*

Lessons from the Orange Book (Back to Basics)  
Class #602  
Location - Classroom 2A

From basics airways to tourniquets, we had it right in the beginning. A retrospective and forward look of EMS Care. Lecture with lab using tourniquets and heavy duty bandaging.  
*CEU's = 1.5 hrs. Trauma*

Mini MCI  
Class #607  
Location - Classroom 1A

We will discuss the capabilities of local and regional responses. We will do an evaluation of what actually is an MCI for different regions in NM, what resources are available in your area and who to contact to activate those resources.  
*CEU's = 1.5 hrs. Operations*

Stand By for?  
Class #608  
Location - Classroom 1A

Every EMT has to pull duty at the local athletic event that needs an EMS stand-by unit, whether it be a football game, triathlon, marathon, rodeo, bicycle fundraising event, etc. Topics include traumatic injuries, dehydration, hyperthermia, hyponatremia, mass casualty injuries and a potpourri of other conditions that may be encountered.  
*CEU's = 1.5 hrs. Trauma*

Traumatic interventions in the Field  
Class #609  
Location – Classroom 3 Fire Station

A discussion of the types of traumatic injuries an EMS crew may encounter and the lifesaving interventions they can perform to stabilize and treat the patient prior to and during transport.  
*CEU's = 1.5 hrs. Trauma*
Radiation Emergencies  
Class #611  
Location - Classroom 1A

Participants will learn about ionizing radiation, detection methods, evaluating and caring for the contaminated patient and irradiated patients as well as antidotes to radiation.

CEU's = 1.5 hrs. Medical

When Pepto Doesn't Work  
Class #612  
Location - Classroom 1B

Nausea, vomiting, and diarrhea are extremely common complaints that patients present with. Providers often overlook these symptoms are merely a trivial complaint. However, these conditions may be a significant event or be a warning sign of a life-threatening condition. This presentation discusses causes of these conditions, what it may indicate, and pre-hospital treatments. Those in attendance need to bring with them a strong stomach and a sense of “bathroom humor”!

CEU's = 1.5 hrs. Medical

Pediatric Trauma  
Class #613  
Location - Classroom 2A

A discussion of pediatric trauma and how it differs from adults: different injuries, assessment, and management.

CEU's = 1.5 hrs. Pediatric

Look out for that Car  
Class #618  
Location - Classroom 1A

This class will take case studies of auto vs pedestrians, review the cause, injuries obtained and the treatment of those injuries. We will also discuss if we can play a part in prevention of such accidents.

CEU's = 1.5 hrs. Trauma

Kids Do the Darndest Things  
Class #619  
Location - Classroom 2A

Try as we may, kids get into everything. We limit their access to dangerous or harmful items around the house, but we may overlook things. Over the counter prescription drug abuse and overdose has been on the rise for over ten years. In fact, NSAID’s are the third most commonly intentionally overdosed medicine, and other OTC’s are responsible for a number of hospital visits and admissions. Join James as he reviews the reasons for overdoses, symptoms, side effects, and treatments for pediatric over the counter medication toxicities during a case-based approach.

CEU's = 1.5 hrs. Pediatric

The Actual Role of the Incident Commander On-Scene!  
Class #620  
Location - Classroom 2A

It's not... the person treating the patient, putting out the fire or arresting the bad guy! A look at ICS and the REAL role of the I/C and the other KEY general staff positions, followed by team competition exercises to develop an ICS team on the fly.

CEU's = 1.5 hrs. Operational

Landing Zone Class  
Class #701  
Location - Classroom 1A

The critical phase of helicopter flight is landing and departing the scene. Trained ground personnel are a vital part of helicopter operations. Selection of a flat surface, firm ground, free of obstacles, frequency and focus provide the necessary conditions for a safe landing and departure. Safety near the helicopter is paramount!

CEU's = 2 hrs. Operations

Wildland Firefighter Care  
Class #702  
Location - Classroom 1B

Many EMS responders are now pressed into services in the “Initial Attack” phase of caring for Wildland Firefighters. A look at the style of injuries you are likely to encounter and their treatment, with lab on foot care and eye wash.

CEU's = 1.5 hrs. Medical

My breath is Barely There  
Class #703  
Location - Classroom 2A

Asthma is a condition that is very common and its prevalence is rising worldwide. The patient experiencing an inflammation of their asthma may experience symptoms which may be relatively minor or may be life threatening? This session will provide a brief history of this condition, its pathophysiology, treatments, and a review of several real life cases.

CEU's = 1.5 hrs. Your Choice -Medical or Airway

Pediatric Resuscitation  
Class #706  
Location - Classroom 1A

There are few things that cause EMS providers more distress than having a pediatric patient who is not responding well. This class will guide you through pediatric assessment and management when pediatric resuscitation is needed.

CEU's = 1.5 hrs. Pediatric
**Backboards Are Out - Now What?**
Class #707  
Location - Classroom 1B  

With the rapidly changing EMS patient care, many EMTs are uncertain how to move patients. We will go through the basics and add a few new tricks to your EMS tool box. Lecture and lab on how to move patients in the new and improved backboard-less world.

*CEU's = 1.5 hrs. Trauma*

**Hey! Ya'll Aren’t Going to Believe What I Just Ran On!**

Class #708  
Location - Classroom 2A  

Isn’t it great when one of our co-workers steps out of the truck and spouts out “You won’t believe what I just ran on?” With baited breath, we eagerly await the story which may reveal something unusual, weird, uncommon, funny, or just downright disturbing. Join James as he shares several incidents he and his coworkers have experienced over the years and how they were managed.

*CEU’s = 1.5 hrs. Medical*
Friday
8 AM to 9 AM

9-11 Memorial Ceremony
Never Forget!

On September 11, 2001 our nation was attacked resulting in the loss of 2996 lives! Of those, 412 were Emergency Responders including 343 Firefighters, 15 EMTs, and 60 Police Officers!

We must Never Forget!

We will honor the memories of all those who fell on September 11th, 2001. Dress for the day: If you are enrolled in one of the Live Fire evolutions immediately following the Memorial Service please wear your turnout gear. For all others, please wear your Class "A" Uniform or your Department's Best.
Sunday,
September 13, 1 PM on the Fire Grounds

Firefighter/EMS Skills Challenge

Come sign up! Competition will begin at 1 PM and will run similar to a track meet all afternoon. You will still be able to get into some of the Hands-On Live Fire Training as well as participate in various skills competition. Bring your turnout gear and be ready to get wet! All Fire Skills are based on NFPA Job Performance Skills. All EMS Skills are based on Basic Level Skills. Turn required Skills into challenging competition. This event will run from 1 PM until all events have been accomplished.

Hot dogs and soft drinks will be served all afternoon! Don’t miss the Fun!!!

A complete list of competition rules will be sent via email before the event.

Details: Note: This training is not subject to the time overlap rule. Signing up for this event will not affect your other selections for Sunday afternoon.
Tuesday
September 15th
6 PM to?

The

2015 Fire & EMS Expo Awards Ceremony

Catered by El Camino and the city of Socorro

At Best Western Convention Center

Awards will be presented

Games, Food, and Drinks will be available until we decide to go home.
# 2015 Fire and EMS Expo Recognition Award Nomination Form

Date of Awards Ceremony: Tuesday, September 15th, 2015  
Time of Ceremony: Awards presented during Barbeque (6 PM to 9 PM)  
Location of Ceremony: Best Western Conference Center  
Application Deadline: August 15th, 2015

All submitted awards information will be reviewed by the 2015 New Mexico Fire and EMS Expo Committee who will determine the award recipient for each category. It is possible that not all categories will be awarded and sole discretion is left to the committee to decide. Category descriptions are provided on the reverse side of this application.

**A minimum one page typed justification needs to be attached to all nominations.**
